Mobile ATC (Air Traffic Control Tower)

Configuration for 2-4 operators with optional foldable rooftop for easy C-130 transport without removal from trailer.

The units enable 24/7 operations in all seasons, in different climatic zones, typically: air temperature: from -45°C to + 55°C, humidity: up to 100%, wind speed: up to 40 m/s

Transportable by roads, trains, ships, air carriers (C130, An-70...)

Typically, tower is designed for operation of 2-4 controllers with optional equipment. TWR cabin is capable of being operated elevated in any discrete step up to fully elevated position with floor height over terrain 6,5m / 8 m / 12 m, depending on lifting system type. The mobile unit is deployable within in short time: mobile unit in 45-60 min by 2 personnel.
