BULKHEAD

Bulkhead lighting refers to a type of robust, durable lighting fixture that is typically designed for outdoor use or in areas that require heavy-duty, weather-resistant lighting. These fixtures are usually mounted on walls or ceilings and are known for their sturdy construction and ability to withstand harsh environmental conditions, such as rain, dust, and extreme temperatures. Bulkhead lights are commonly used in industrial, commercial, and residential settings for both security and functional lighting.

Durable and Weather-Resistant : Bulkhead lights are made from strong materials like aluminum, polycarbonate, or stainless steel, and often have IP ratings (Ingress Protection) to ensure they are weather-resistant and waterproof. This makes them suitable for outdoor environments or indoor areas exposed to moisture or dust.

Energy-Efficient : Many bulkhead lights now feature LED technology, offering energy-efficient lighting with low power consumption. LEDs are long-lasting, reducing the need for frequent bulb changes and maintenance.

Indoor and Outdoor Applications : Although bulkhead lights are primarily used outdoors, their robust construction makes them suitable for indoor use in areas like parking garages, utility rooms, and industrial facilities. They are ideal for environments where traditional indoor lighting might not be durable enough.

High Quality LED

Prodcut Code	Wattage	Dimension		
		Length (mm)	Breadth (mm)	Height (mm)
SLSF 10 (BH)	10	170	70	50
SLSF 20 (BH)	20	210	100	60
SLSF 20 (SLBH)	20	210	81	67
Operating Voltage: 100-440VAC	IP Rating: IP 20	Power Factory: > 0.95	CRI: > 80	Colour Temp: W/WW/R/G/B/P

APPLICATIONS

Offices

Hospital

Homes

Bedroom

Living Room

Outdoor Lighting : Bulkhead lights are widely used for outdoor lighting in areas like gardens, patios, porches, and parking lots. Their weather-resistant design ensures they can provide reliable illumination in harsh outdoor conditions.

Industrial and Commercial Use : In factories, warehouses, and workshops, bulkhead lighting provides durable, bright illumination that can withstand tough environments. They are also commonly found in loading docks, storage facilities, and manufacturing plants.

Security Lighting : Bulkhead lights are often used as security lighting in both residential and commercial properties. Installed near entrances, walkways, or perimeters, they offer a reliable and durable solution for well-lit, secure areas.
