COB TRACK / WALL SPOTS

COB Track / Wall Spots are specialized lighting fixtures that combine Chip-on-Board (COB) LED technology with versatile mounting options for track or wall installations. These spotlights are designed for directional lighting, providing a focused beam that can be easily adjusted to highlight specific areas or objects. Their flexible installation options make them ideal for both residential and commercial environments where adjustable, precise lighting is required.

Adjustable Spotlights : The adjustability of COB track and wall spots allows the light to be angled in different directions, providing focused lighting where it's needed. This makes them ideal for highlighting artwork, architectural features, or specific areas of a room. Their versatile design means you can easily change the direction of the light without moving the entire fixture.

Focused Lighting with Precision : These spotlights offer narrow beam angles, making them perfect for task lighting or accentuating specific elements in a room. The focused light output helps draw attention to key features, making them popular in retail environments, galleries, and showrooms where lighting precision is essential.

Energy Efficiency :Like other COB LED fixtures, track and wall spots are highly energy-efficient. They consume significantly less power compared to traditional halogen or incandescent lights while producing bright, focused illumination. This makes them a cost-effective and environmentally friendly lighting option.

Durable and Long-Lasting : Made from high-quality materials such as aluminum and polycarbonate, COB track and wall spots are durable and designed for long-term use. The COB LED technology also contributes to a longer operational life, reducing maintenance and replacement costs.

Product Code	Watt	Wall Spot Base	Housing Colour	Reflectors	Dimension	
					Dia(mm)	Height(mm)
SLNTR 3 (COB)	3	Available	White	Rose Gold	30	145
SLNTR 6 (COB)	6	Available	White	Rose Gold	35	150
SLNTR 9 (COB)	9	Available	White	Rose Gold	45	170
SLNTR 10 (COB)	10	Available	White / Black	Lense / Reflector	50	130
SLNTR 20 (COB)	20	Available	White / Black	Lense / Reflector	65	160
SLNTR 30 (COB)	30	Available	White / Black	Lense / Reflector	75	180
SLNTR 50 (COB)	50	Available	White / Black	Reflector	90	180
Operating Voltage: 100 - 440VAC		IP Rating: IP 20	Power Factor: >0.95	CRI: >80	Colour Temp: 3000K/4000K/6500K	

APPLICATIONS

Offices

Hospital

Homes

Bedroom

Living Room

Art Galleries and Museums : In galleries and museums, COB track and wall spots are perfect for highlighting artwork, sculptures, and exhibits. The adjustable spotlight ensures that lighting can be precisely focused to enhance the viewing experience without creating glare or shadows.

Retail Stores : These lights are widely used in retail environments to draw attention to products and displays. The focused, adjustable lighting helps create visual interest and enhances the shopping experience by making merchandise stand out..

Residential Use : In homes, COB track and wall spots are great for accent lighting in living rooms, kitchens, and hallways. Their sleek design and ability to adjust the direction of the light make them ideal for highlighting artwork, bookshelves, or architectural details.

Commercial Spaces : Offices, restaurants, and hotels benefit from the flexibility and style of COB track and wall spots. They provide focused task lighting or can be used to create mood lighting in reception areas, dining rooms, or meeting rooms.
