ADJUSTABLE PANEL

The Adjustable Panel is a versatile lighting fixture designed to provide customizable illumination by allowing users to adjust the mounting clips as per the cutting size of ceiling. These panels are engineered with adjustable features that make them highly adaptable for various lighting needs, from residential to commercial applications. The ability to adjust as per the cutting size, makes it a popular choice for retro-fitting solutions.

Adjustable Design : The defining feature of an Adjustable Panel is its ability to adjust the mounting clips as per the ceiling cutting size.

Energy Efficiency : Like most modern lighting solutions, Adjustable Panels typically use LED technology, making them highly energy-efficient. LEDs consume less energy than traditional incandescent or fluorescent bulbs, providing significant energy savings and reducing the environmental impact.

Prodcut Code	Series	Wattage	Length / Dia (mm)	Breadth (mm)	Height (mm)	Cut Out (mm)
SLDLPL 6R/SQ(CADJ)	CA Series	6	100	100	25	45-80
SLDLPL 9R/SQ(CADJ)	CA Series	9	115	115	25	45-80
SLDLPL 15R/SQ(CADJ)	CA Series	15	175	175	25	45-130
SLDLPL 20R/SQ(CADJ)	CA Series	20	230	230	25	45-180
Operating Voltage: 100-440VAC		IP Rating: IP 20	Power Factory: > 0.95	CRI: > 80	Colour Temp: 6000K/4000K/3000K	

THE DIVERSE USES OF ADJUSTABLE PANEL

Retrofitting Solutions : With the adjustability feature, these panels are most popular among retrofitting lighting solutions as same panel can be used in small and biSLer ceiling cutting sizes as per the customers need.

Commercial Spaces : Offices, showrooms, and retail stores benefit from the flexibility of Adjustable Panels, allowing for adaptable lighting solutions in dynamic environments.

Residential Spaces : Perfect for living rooms, bedrooms, and kitchens where adjustable lighting enhances comfort and functionality.

Hospitality and Art Galleries : Adjustable Panels can be used in hotels and restaurants during their repair and renovation works.
