## COMMERCIAL PANEL

The Commercial Panel is a high-performance lighting solution designed specifically for use in commercial and industrial spaces such as offices, retail stores, hospitals, schools, and warehouses. These panels provide bright, uniform illumination, making them ideal for large areas that require efficient and long-lasting lighting. Commercial Panels are typically made using LED technology, offering both energy efficiency and durability, which results in significant cost savings over time.

**Bright and Uniform Lighting** : Commercial Panels are engineered to deliver consistent, even lighting across large spaces. They are designed to eliminate dark spots and shadows, providing bright, glare-free illumination, which is critical for productivity and safety in commercial settings.

**Energy Efficiency** : These panels utilize LED technology, which consumes significantly less power than traditional incandescent or fluorescent lights. This makes Commercial Panels an eco-friendly and cost-effective solution for businesses looking to reduce their energy consumption and lower electricity bills.

**Long Lifespan** : Equipped with durable LED lights, Commercial Panels offer a long operational life, reducing the need for frequent replacements. This significantly lowers maintenance costs and ensures consistent lighting over time, making them a reliable option for businesses.

Prodcut Code	Wattage	Length / Dia (mm)	Breadth (mm)	Height (mm)	Weight (Kg)
SLLD 36 (P)	36	595	595	40	1.70
SLLD 48 (P)	48	595	595	40	1.70
Operating Voltage: 100-440VAC		IP Rating: IP 20	Power Factor: >0.95	CRI: > 80	Colour Temp: 3000K/4000K/6500K

## APPLICATIONS

Offices

Hospital

Showrooms

Retail

**Offices** : Commercial Panels provide bright, even lighting that improves employee productivity and creates a comfortable working environment. Their glare-free and flicker-free design makes them ideal for office spaces where employees spend long hours working under artificial light.

**Retail Spaces** : These panels help create a welcoming and well-lit atmosphere that enhances product visibility, making them an excellent choice for stores, supermarkets, and showrooms.

**Healthcare Facilities** : Commercial Panels are commonly used in hospitals, clinics, and other healthcare settings, where bright, even lighting is essential for patient care and medical procedures.
